National Impacts

2021p

National / Summary

U.S. Travel Impacts 2021p

The COVID-19 pandemic brought economic disruption to almost all sectors of the U.S. economy in 2020, but few industries were as hard hit as travel. The combination of economic instability and health and safety measures in the U.S. led to a large reduction in the demand for such services. Total travel output decreased by 48% (-\$525B) in 2020, as compared to 2019 levels. In 2021 travel activity continued the recovery started in mid-late 2020, by the end of 2021 travel output increased approximately 48% (+\$268B) compared to 2020 levels. An additional \$256 billion is needed to reach 2019 levels of travel output.

At the time of this report, the Bureau of Economic Analysis (BEA) Tourism Satellite Account covered travel activity through 2020; all 2021 estimates have been made by Dean Runyan Associates.

- Spending by resident and foreign visitors was \$837 billion in 2021 in current dollars. This represents a 48% increase over 2020. When adjusted for inflation (real dollars), spending increased by 47% from 2020 to 2021.
- Leisure & Hospitality, as a share of total spending, decreased to 43%, compared to 48% in 2020. The overall shift in total spending was influenced by the return to air travel, and price increases for gasoline.

The U.S. travel industry **expanded 48% (\$268B) in 2021**, after losing a combined \$525 billion in 2020.

Direct Travel Output 2000-2021p

Spending by Summary Commodity 2000-2021p

National / Summary

International Spending 2021p

International spending was up 38% in 2021.

International markets are still slow to recover as COVID-19 restrictions were still prevalent throughout much of the globe in 2021. It should be noted that the first two months of 2020 were relatively normal, and that 2021 can show additional losses because of those two normal periods.

Sources: Dean Runyan Associates, Bureau of Economic Analysis

National / Summary

U.S. Travel Industry Direct Employment

National employment in the travel industry recovered 230 thousand jobs in 2021 an increase of 7% over 2020. In 2020 travel industry employment decreased by 2.2 million jobs (-36% YOY).

Sources: Bureau of Economic Analysis, Dean Runyan Associates

U.S. Travel Industry Employment by Sector

Leisure and hospitality grew 7.4% in 2021 a gain of 166 thousand jobs. A complicated employment environment is preventing a quicker rebound compared to spending activity.

State Impacts

2021p

California / Summary

Travel Impacts 2021p

Visitors traveling to and throughout California represent an important component of the state's economy. Travel originating in domestic and international markets generates valuable business sales, payroll, employment and tax receipts for the state as well as for local jurisdictions. Further, many locations within California serve as travel destinations in their own right, for both California residents and out-of-state visitors. These areas accordingly consider travel and tourism a primary industry.

This report describes the direct economic impacts of travel to and through the State of California and each of its 58 counties. This report also includes statewide estimates of spending by resident and non-resident visitors and the secondary employment and earnings impacts associated with travel spending. A primary objective of this research is to provide reliable, detailed estimates, which allow comparisons from year-to-year for the state and county levels.

In 2021, the California travel economy was still recovering after the fall from the peak year of 2019. Strong demand for overnight accommodations and increased commodity prices led to large gains in visitor spending. Employment in 2021 continues to recover, but the rate of recovery is much reduced compared to the other impact categories.

Reported in this report are the primary metrics upon which the benefits of travel on the state can be measured. It should be noted that these measures declined at unprecedented rates during 2020 and the resulting increases in 2021 increased at unprecedented rates and that while most of these figures represent annual aggregated totals, employment figures represent an annual average.

Spending, Employment, Earnings, and Taxes are the key metrics to measure the economic impacts of travel.

What are travel impacts?

Travel impacts measure the economic activity associated with the activity of travel within a region. As travel is a broad activity that encompasses many other activities (transportation, lodging, eating & drinking, recreational activities, etc.), it is necessary to make estimates for each of the composite elements of travel in order to arrive at a total number. Reporting on travel impacts allows decision-makers to benchmark the travel industry against other local industries, gain insight on the makeup of traveler activity in their region, and communicate clearly to stakeholders the relevance of the traveler economy to their region.

California / Spending

Direct Travel Spending

Direct travel spending increased by **\$31.7 billion** in 2021.

California Travel Spending

In 2021, travel spending grew to \$100.2 billion, a 46.3% increase from the prior year.

Since the peak of 2019, travel spending has declined by 30.9%.

Direct Travel Spending by Region

California - Regions

The largest MSA in terms of travel impacts is the San Francisco Bay Area. In 2021 travel spending was \$21.5 billion, contributing 31.3% of the state total.

The top 5 regions contribute 68.7% of direct travel spending in the state.

Destination + Other Travel =
Direct Travel Spending

What is direct travel spending?

Direct travel spending includes both destination spending and other spending. **Destination spending** refers to all spending on goods and services by visitors at the destination. **Other travel spending** refers to expenditures at travel arrangement companies located in California, convention and trade show operations, and spending on air by residents to leave the state for travel elsewhere. These expenditures directly support the travel industry but are not considered visitor spending in our methodology.

California / Spending

Direct Spending / Real and Current Dollars

Adjusted for inflation the real dollar increase in travel spending in 2021 was 34.6%. This compares to a 46.3% increase in current dollars.

Sources: Dean Runyan Associates, Bureau of Labor Statistics CPI

California / Spending

Visitor Spending by Commodity Purchased / California

The largest gain occurred in food and beverage service -- \$8.8 billion more in spending in 2021 compared to 2020, an increase of 51.4%.

Spending on accommodations grew by approximately \$7.5 billion, an increase of 46.8%.

Visitor Spending by Accommodation Type / California

Visitors who stayed in a Hotel, Motel, or STVR spent \$52.4 billion in 2021, an increase of 44.0%.

Visitors who stayed in a Private Home with friends and relatives spent \$17.0 billion in 2021, an increase of 136.1%.

Sources: Dean Runyan Associates, Omnitrak Group, Energy Information Administration, Bureau of Labor Statistics CPI, STR LLC.

California / Earnings

Direct Travel Earnings

Direct travel earnings increased by \$3.2 billion in 2021.

California Travel Earnings

In 2021, regional travel earnings grew to \$44.5 billion, a 7.8% increase from the prior year.

Since 2019, travel industry earnings have declined by 18.6%.

Travel Industry Earnings by Industry

Travel Industry Breakout

Accommodation and Food Services account for more than half (53.5%) of travel industry earnings. Arts, Entertainment, and Recreation (AER) accounts for 19.8%.

*Accommodation & Food Services (ACM & FS)
Arts, Entertainment, Recreation (AER)*

(Revenue - Cost of Goods Sold -
Expenses - Point of Sale
Taxes)
=
Earnings

What are direct travel-related earnings?

Direct travel-related earnings represent the total after-point of sale tax income from travel activity. It includes wage and salary disbursements, proprietor income, and other earned income or benefits.

Earnings are an important measure of the benefit of the travel industry that flow to proprietors and employees. Because the travel industry is highly labor intensive, much of travel-related earnings flow to workers in the form of wages as opposed to owners of capital and intellectual property assets.

California / Employment

Direct Travel Employment

Direct travel employment increased by 55,900 jobs in 2021.

Direct Travel Employment

The travel industry supported approximately 927 thousand jobs in 2021, a 6.4% increase from the prior year.

Since 2019, travel industry employment has declined by 21.2%.

Direct Travel Industry Employment by Industry

Travel Industry Breakout

Accommodations and Food Services (ACM & FS) account for over half (57.6%) of travel industry jobs. Arts, Entertainment, and Recreation (AER) accounts for 22.4%.

Accommodation & Food Services (ACM & FS)
Arts, Entertainment, Recreation (AER)

What is direct travel employment?

Direct travel-related employment refers to the total number of full and part-time jobs directly attributable to travel spending. A significant share of many industries' earnings come from travel-related spending. Part of these earnings are used to pay employees in the form of income and benefits. Based on average salaries for employees in the various travel-related industries in California, a total employment number attributable to travel can be reached.

In 2021, every \$1 million in travel-related spending resulted in 9.3 jobs for the industry.

California / Employment

Travel Industry Employment by Sector / California

*Other travel includes travel arrangement services

**Retail includes gasoline

CARES act support included, data limitations prevent disaggregation.

2021 2020

Total direct employment increase by approximately 55,900 jobs. Leisure and Hospitality gained 67,500 jobs in 2021, while all other travel industry employment, most notably transportation, lost 12,300 jobs. Overall, travel industry employment experienced an increase of 6.4%.

Sources: Dean Runyan Associates, Bureau of Labor Statistics, Bureau of Economic Analysis

California / Tax Receipts

Direct Travel-Generated Tax Revenue

Direct travel-generated tax revenue increased by \$2.8 billion in 2021.

California Tax Receipts

Travel-generated tax revenue increased to \$15.0 billion in 2021, an increase of 23.1% from the prior year.

Since the peak year of 2019, travel-generated tax revenue has fallen by 25.4%.

Direct Travel-Generated Tax Revenue by Local and State

State Taxes

State and local tax receipts account for 65.3% of travel-generated tax revenue (excluding Federal taxes). State and local tax receipts grew 32.8% compared to 2020.

What are direct travel-generated tax receipts?

Direct travel-generated tax receipts include state and local taxes related to travel. **State taxes** include lodging taxes, motor fuel taxes, and sales taxes, as well as business and personal taxes paid by employees and proprietors of travel-related businesses. **Local taxes** primarily take the form of lodging taxes imposed by cities, counties, and other tax jurisdictions in California. They also include any applicable local sales tax.

Tax Receipts

2021 Calendar Year

California / Travel Industry Tax Revenue

Travel Industry State and Local Government Tax Revenues, 2020-2021 FY

The distribution of taxes generated by the travel industry for the 2020-2021 fiscal year is shown in the following chart. Sales tax receipts are distinguished between those that are generated by visitor spending and those that are generated by the spending of travel industry employees.

Source: Dean Runyan Associates. "Other" travel generated tax revenue includes passenger facility charges for visitors who travel to California Airports.

Sales taxes generated by the travel industry make up 78.2% of all travel generated tax revenue, 61.8% of these taxes are attributable to visitors, the other 16.4% to the purchases made by employees in the travel industry.

California / Travel Industry Tax Revenue

Industry Gross Domestic Product and Taxes, 2020 CY

One way to consider the contributions of various industries is to express the tax payments of businesses to government as a percentage of their Gross Domestic Product. Both figures highlight these tax payments for a sample of goods-producing and service sectors in the state, including travel.

Taxes on production and imports (TOPI) includes most taxes paid by businesses except for income taxes. This is why retail trade and travel have relatively high proportions of tax payments to their corresponding gross domestic products. Industries with negative TOPI amounts are due to subsidies in excess of production and import taxes.

Production & Import Taxes as a Percent of GDP, Selected Industries, 2020 CY

Industry	GDP (Millions)	TOPI (Millions)	Percent
Information	\$317,647	\$3,771	1.2%
Construction	\$120,390	-\$8,166	-6.8%
Health care and social assista	\$194,070	-\$9,024	-4.7%
Manufacturing	\$356,436	\$3,572	1.0%
Retail trade	\$158,148	\$30,845	19.5%
Travel	\$63,278	\$3,315	5.2%
All industry total	\$3,007,188	\$103,243	3.4%

Source: Bureau of Economic Analysis and Dean Runyan Associates
TOPI denotes taxes on production and imports less subsidies.

California / Traveler Origin

Visitor Spending by Origin, 2021p

Residents of California accounted for 70% of all travel spending in California in 2021. U.S. residents of states other than California accounted for approximately 24% while international visitors accounted for 6% of travel spending in the state.

International spending has historically constituted 18-22% of total travel spending in California. The COVID-19 pandemic resulted in travel restrictions to the U.S. from multiple large travel markets, causing the share of international spending to drop to approximately 6%.

Visitor Spending by Residence, 2021p

Origin	Spending (Billions)
California	\$65.8
International	\$5.4
Other U.S.	\$22.5
Visitor Spending	\$93.6

International Visitor Spending

International spending impacts for California were derived from the U.S. International Transaction estimates from the Bureau of Economic Analysis (BEA) and origin & destination counts from the National Travel and Tourism Office. Spending for 2016-2021 is sourced from Tourism Economics.

California / Air Travel & Employment Trend

Air Passenger Visitor Arrivals / U.S. Air Carriers

Visitor air travel on domestic flights to California destinations increased by 57% in 2021, from 14.1 million to 22.1 million arrivals.

Sources: Bureau of Transportation Statistics, Dean Runyan Associates

Travel Employment / California

Travel industry employment increased by 6.5% in 2021, a gain of approximately 56,000 jobs.

Sources: Dean Runyan Associates

California / Travel GDP

Travel Industry GDP, 2021p

Gross Domestic Product (GDP, also referred to as value-added) is a measure of economic activity that reflects the market value of the labor and capital used to produce goods and services. The GDP for a particular industry within a state excludes the intermediate inputs purchased by businesses from other firms in the production process. It includes payments to individual in the form of earnings, indirect business taxes to government, and other payments to individuals and corporations. The relationship between travel spending and the GDP of the California travel industry is shown to the right. California travel industry GDP of \$67.3 billion represents approximately 2 percent of the total California GDP.

The estimates represent only the direct impacts of travel spending. A portion of the inputs purchased by travel businesses in California will be delivered by other California firms that are not strictly part of the travel industry. Restaurants, for example, will purchase agricultural products from other California businesses. These inputs are sometimes referred to as "indirect" effects.

California / Secondary Effects

Travel spending brings money into many California communities in the form of business receipts. Portions of these receipts are spent within the state for labor and supplies. Employees, in turn, spend a portion of their earnings on goods and services in the state. This re-spending of travel-related revenues creates indirect and induced impacts.

Direct impacts represent effects attributable to traveler expenditures.

Indirect impacts represent effects associated with industries that supply goods and services to the direct businesses.

Induced impacts represent effects of purchases made by employees in both the direct and indirect businesses.

The impacts in this section are presented in eleven major industry groups. These industry groups are similar, but not identical to the business categories presented elsewhere in this report. (The specific industries that comprise these groups are listed in Implan/Secondary Effects on the following two pages.)

It should be emphasized that the estimates of indirect and induced impacts reported here apply to the entire state of California and do not necessarily reflect economic patterns for individual counties, regions or sub-regions within the state. In general, geographic areas with lower levels of economic activity will have smaller secondary impacts within those same geographic boundaries.

Largest Secondary Industries 2021p

Professional Services (122,900 jobs and \$10.0 billion in earnings) A variety of administrative services (e.g., accounting and advertising) are utilized by travel businesses. Employees of these businesses also purchase professional services.

Education & Health Services (90,500 jobs and \$6.9 billion in earnings) The secondary effects are primarily induced, such as employees of travel-related businesses use of medical services.

Financial Activities (74,000 jobs and \$5.2 billion in earnings) Both businesses and individuals make use of banking and insurance institutions.

Other Services (45,500 jobs and \$2.6 billion in earnings) Employees and travel businesses utilize a number of service providers such as repair shops, laundry, maintenance, and business services.

Full list of industries available in Implan/Secondary Effects on the following two pages.

Details may not add to totals due to rounding.

*Sum of county visitor spending is less than statewide visitor spending because a portion of county ground transportation is allocated to "other travel" at the court level.

Note: Total Earnings includes wage and salary disbursements, other earned income and proprietor income. Employment includes payroll employees and proprietors.

Business or Employee	11	12	12	13	13	13	13	14	14	17	▲ 17.5%
TOTAL	72	72	75	72	69	71	85	90	53	81	▲ 53.8%

Details may not add to totals due to rounding. Percent change calculated on unrounded figures.

Local tax receipts include transient occupancy taxes, sales taxes, and airport passenger facility charges paid by visitors, and the property tax payments and sales tax payments attributable to the travel industry income of employees and businesses. State tax receipts include sales tax payments and motor fuel tax payments of visitors, and the income tax payments and sales tax payments attributable to the travel industry income of employees and businesses.

Economic impacts are attributed to visitor trips which are defined as trips taken by individuals that stay overnight away from home, or travel more than 50 miles one-way on a non-routine trip, as defined by the California Tourism Marketing Act

Details may not add to totals due to rounding. Percent change calculated on unrounded figures.

Local tax receipts include transient occupancy taxes, sales taxes, and airport passenger facility charges paid by visitors, and the property tax payments and sales tax payments attributable to the travel industry income of employees and businesses. State tax receipts include sales tax payments and motor fuel tax payments of visitors, and the income tax payments and sales tax payments attributable to the travel industry income of employees and businesses.

Economic impacts are attributed to visitor trips which are defined as trips taken by individuals that stay overnight away from home, or travel more than 50 miles one-way on a non-routine trip, as defined by the California Tourism Marketing Act

Details may not add to totals due to rounding. Percent change calculated on unrounded figures.

Local tax receipts include transient occupancy taxes, sales taxes, and airport passenger facility charges paid by visitors, and the property tax payments and sales tax payments attributable to the travel industry income of employees and businesses. State tax receipts include sales tax payments and motor fuel tax payments of visitors, and the income tax payments and sales tax payments attributable to the travel industry income of employees and businesses.

Economic impacts are attributed to visitor trips which are defined as trips taken by individuals that stay overnight away from home, or travel more than 50 miles one-way on a non-routine trip, as defined by the California Tourism Marketing Act

Definition

Accommodation types that house transient lodging activity.

Personal residences used to host visiting friends and family overnight.

Combination of other overnight visitors who stay in campgrounds or 2nd homes.

Greater than 50 miles traveled non-routine to the destination.

Direct spending made by visitors in a destination.

Spending by residents on travel arrangement services, or spending for convention activity.

Expenditures made by consumers, combination of Visitor Spending and Other Spending.

Total after-tax net income from travel. It includes wage and salary disbursements, proprietor income, and other earned income or benefits.

Employment generated by direct spending; Includes full time, part time, seasonal, and proprietors.

City and county taxes generated by travel spending.

State taxes generated by travel spending.

Interchangeable with Visitor Spending. Direct spending made by visitors in a destination.

Short Term Vacation Rental, private and semi-private lodging rented by owners or property management companies (e.g. Airbnb, VRBO).

Homes under private ownership for personal use as a vacation property.

Assumptions / Methodology

Travel Impacts Methodology

Dean Runyan Associates uses our proprietary Regional Travel Impact Model (RTIM). This input-output model uses a fiscal based approach to accurately quantify travel and reduce reliance and variability of survey data. Each accommodation type (Hotel/Motel/STR, Private Home, 2nd Home, Camping, and Day) is modeled uniquely to capture the different types of economic contributions from these visitors. Earnings and employment data are derived from the relationship between business income and employee expenses. Tax receipts are generated based on each unique tax rate that applies to the underlying economic activity.

Our approach starts at local levels of geography building up to state findings.

The RTIM is in use in 12 states covering over 400 counties and local jurisdictions. Findings from this study are directly comparable to any of our research publications.

Travel Impacts Assumptions

- Overnight visitors are defined as non-local overnight visitation utilizing accommodations that are Hotels/Motels/STR, Camping, Private Home (VFR), and 2nd home ownership.
- Day visitors include anyone that has traveled 50 miles one way, and is not routine travel (commuting or periodic retail trips).
- Travel contains tourism activity, business activity, and other transient activity.
- Source data is accurate and complete. (Sources include: Bureau of Labor Statistics, Census Bureau, Bureau of Economic Analysis, STR LLC., U.S. Department of Transportation, Omnitrak Group, California Department of Tax and Fee Administration).
